

Introducing SmartArchive...

Modern technology, what would we do without it? The concept of electronic reliance is deeply ingrained in our culture; it enables us to access information with a mere tap of a finger. Technological innovations streamline an infinite number of once-onerous tasks. In order to understand how advancements can improve your bottom line, let's look at data archiving.

Did you know The PLD Group archives your print files, BMR's and print images (PDF) of your statements, invoices, letters, and critical communications for one year at NO CHARGE? Many struggle to maintain compliance standards for data archiving in daily operations but an additional concern is whether one year is enough. The PLD Group has unveiled an archive program that will now offer an extended timeframe in order to meet or exceed your document archiving needs.

Imagine improving document management services without adding expensive hardware or software to your current systems. SmartArchiving gives you the power of the fastest, most efficient, internet document viewing and archiving available today at a remarkably low price. SmartArchiving is an extremely powerful and advanced system utilizing hard drive technology for instant access of images (PDF) for all of your printed critical communications.

INCREASE BUSINESS PRODUCTIVITY

Using advanced online technology and security, SmartArchiving builds a valuable repository of statements, invoices, letters—all frequently referenced documents required by law to be archived for a regulated period of time.

SmartArchiving stores a limitless amount of print files, BMR's (Business Management Reports), and print images (PDF) instantly, collecting ASCII data from other systems, comparable to systems costing hundreds of thousands of dollars. Now, any facility can realize the benefits of extended archiving by partnering with The PLD Group and enrolling in SmartArchiving.
